

# Vacuum Glass Lifter

## VB6 RCEBE

**The VB6 RCEBE is vacuum lifter with electric tilt and rotation, battery operating system and dual vacuum circuit.**

The VB6 RCEBE is a below-the-hook lifting accessory suitable for lifting and handling of glass units weighing up to 600 kg.

The VB6 RCEBE features electric tilt and electric 360 degree rotation.

### Technical specification

Application	glass panels
Lifting capacity	max 600 kg
Suction pads	number 6 round pads, diameter 310mm pads with safety ring and sealing lip
Pad spread	mm 1420x678 in standard configuration
Load movement	continuous powered 360 degree rotation 90 degree powered tilt
Operating system	DC vacuum pump powered from on-board batteries high capacity re-chargeable batteries battery status indicator economizer for reduction of the energy consumption
Vacuum system	2 independent vacuum circuits, each vacuum circuit with vacuum reserve and non return valve
Weight of lifter	Kg 195
Structural depth	mm 680
Control	Button cable command Radio remote control as optional
Standard features	Audible and visual low vacuum warning devices Vacuum gauge for each vacuum circuit Battery charger 240 Volt Vacuum filter Multi position hook connection

- Lifting capacity max 600 kg
  - No.6 suction pads Ø 310 mm
  - Battery operating system
  - Electric continues 360° rotation
  - Electric 90° tilt
  - Low vacuum warning device
- ✓ Dual vacuum circuit built to EN13155 standard
